VIDEO MONITORING

View your business on the PC and smartphone at all times.

Keep an eye on everything with VIDEO SURVEILLANCE.

Due to the increasing crime rate, Jewellers are also increasingly demanding higher security precautions. CLARITY & SUCCESS offers various professional and at the same time cost-effective solutions. The cameras provide distortion-free images of moving objects in full resolution. The monitoring software has been developed for professional video surveillance and recording. The function bandwidth includes all the required features for

- discreet camera design
- HDTV quality
- One cable only for each camera
- Power over Ethernet
- Live video monitoring
- Remote access via the Internet also with the smartphone
- Alerting acoustically, by e-mail, call or push message
- Recording by movement or timer
- and much more ...
