

Pricing policy

Clarity & Success is a Jeweller Management Software which you can lease at different stages of development and pay for monthly or annually in advance. The software is a checkout and product management system which offers you complete flexibility and many benefits. You are tied to a particular contract term but you can lease the system for as long as you like and you therefore have the opportunity to terminate the lease at the end of any month.

Clarity & Success software is divided into six development stages (Modules) from "Basic" to "Platinum", and applies to one workstation only. In addition any number of workstations may be booked with the same development stage for this purpose. The monthly fee varies according to the number of workstations and the development stage.

You may store an unlimited number of articles, customers, suppliers, sales and further data in the Clarity & Success software.

The modules and the number of workstations can be used flexibly and enable you to expand (upgrade) or cut down (downgrade). For seasonal and tourist businesses which are closed for certain periods, the system may therefore remain unused and you may lease your desired software module when the season begins again. Where sales increase during the Christmas period, for example, the number of workstations may be expanded flexibly for one month.

If you no longer want to use the software, no direct notice of termination is required. You need only suspend the lease payments. The input data are not lost and the software switches to a viewing and export mode.

The prices are formulated for each business premises. Because you are leasing the software you will always be using the most up to date software version, guaranteed, you will be saving on high initial investments and you will therefore be enjoying complete flexibility.

Your valuable data are stored in a cloud, but remain safe with you in the business. Nevertheless you will have the benefit of being able to access your data at any time. If you have a good Internet connection and access is set up, you may, in particular, gain access to the Clarity & Success software for each business from anywhere, including your home, whilst travelling, at exhibitions, on the premises of your accountant or accounting office - simply from wherever you are at the time.

Branches can network with each other and exchange data mutually.

For the installation and training there are one-off costs which Clarity & Success will offer and discuss with you in detail in advance.

According to your requirement you may your personal software support from four different service stages.

You are welcome to purchase hardware through Clarity & Success or from elsewhere.

Please also read carefully the GENERAL CONTRACTUAL CONDITIONS FOR SOFTWARE, SUPPORT AND UPDATES and the SYSTEM CONDITIONS.
